## O.C.O. NEWS

### O.C.O Technology recognised by the United Nations

The United Nations publication GEO6 (the sixth Global Environment Outlook Assessment for the pan-European region) recognises the importance of accelerated carbonation in tackling climate change, as well as supporting the waste hierarchy and recognising the environmental challenge of disposing of waste to landfill.

Carbon8 Systems, the Kent-based world leader in the permanent capture of

## O.C.O. TECHNOLOGY

We provide solutions for the treatment of industrial wastes and contaminated soils. By using carbon dioxide to produce materials for re-use, or for cheaper disposal, we deliver a unique combination of benefits.
