

JOB TITLE: Quality Control Shift Operative

LOCATION: Brandon

REPORTS TO: Shift Supervisor / Site Supervisor / Site Manager

RESPONSIBLE FOR: Site Traffic Management (deliveries, collections, supplies), Material Testing and General Site Duties

INTERACTS WITH: O.C.O staff at all levels, suppliers and contractors

HOURS OF WORK: 37½ hours per week. 8 hour shifts with ½ hour unpaid break 6am-2pm and 2pm-10pm rolling weekly. 20 days paid holiday plus bank holidays.

DATE OF ISSUE: December 2020

JOB PURPOSE

The primary role of the jobholder is to be responsible for the management of all deliveries, collections and all traffic movements on the site ensuring that all associated paperwork is accurately and diligently recorded. This will include undertaking some basic material testing in a lab and data entry for inbound raw materials, Quality checking of 'in process' production materials, for the processed aggregate leaving the site, and providing feedback to the Senior Shift Supervisor. This includes regular sampling of the aggregate from the production line and storage bays and testing to determine compliance to company product specification.

In addition to these Quality Control activities, general site operative cover/inclusion is required as part of the team to assist in end of shift tasks and the smooth operation of the facility. (This is a hands-on and sometimes physically demanding role).

KEY DUTIES

To assist the Shift Supervisor in the receiving of raw materials, testing of these and providing feedback to ensure production plans are met whilst ensuring quality product.

To assist the Shift Team with vehicle management, administration, record keeping and documentation for the efficient running of the plant and the teams.

Sign in visitors & contractors, issue site rules and instructions and ensure appropriate PPE is being worn and method statements are being followed.

Identify the customer account and material (delivered or collected) and ensure that the correct vehicle registration, customer, product, haulier, source/destination and order number is recorded.

To take responsibility for the accurate testing and data entry of incoming materials and of processed aggregate.

Be aware and control all vehicle movements on site including raw material deliveries, processed aggregate loading/collection and various suppliers ensuring waiting time is minimised.

Produce delivery and collection tickets for all aggregate loads being delivered or collected from the site, spot checking trucks and notifying if vehicles are overweight.

To ensure the laboratory is clean and tidy, supplies are maintained, and equipment is calibrated.
