

JOB TITLE: Aggregate Technical Manager

LOCATION: Mobile

REPORTS TO: Technical Director and HSEQ Manager

RESPONSIBLE FOR: Aggregate quality and compliance to Technical Legislation

INTERACTS WITH: Sales and technical team

HOURS OF WORK: 37.5 hours per week - Monday to Friday 9am to 5pm with a half-hour lunch break but with flexibility to meet the needs of the business

DATE OF ISSUE: 30th September 2021

JOB PURPOSE

Reporting to the Technical Director, the jobholder will have responsibility for the monitoring the quality of product produced by the plants and the placing of products into suitable markets by being aware of compliance towards highways specification, BS, EN, MOT etc

The individual will work closely with the sales team to help place the material into suitable applications in the construction market.

The role will also involve working alongside existing technical team to help maintain and evaluate aggregate quality and improve potential product/process/method development projects.

The successful applicant will make sure customers are sent the latest product information on a regular basis and bring support where needed in sales meetings with potential new and existing customers.

This is presently a small but high profile, high growth company. It is envisaged that the role will grow with the company and may involve training and supervision of others as the team grows.

Experience is necessary, training will be provided on our product. An enthusiastic hands-on approach and willingness to learn and develop new skills whilst utilising experience is essential.

KEY DUTIES

Attending existing and new customer meetings in support of the sales team

Assisting in developing and testing new products/processes/mix designs

Checking that products comply with company standards, and reporting as necessary

Assessing compliance of product to existing/new standards/specifications

Liaising between sales team, site managers, R&D team, and Technical Director.

Data entry and collation and presentation of results

Do root cause on non-conformance of materials on customer sites.

Help implement possible environmental impact assessment (consim) modelling for the business.

Attend industry association (MPA, CBA, BAA) committee meetings.

Production of reports in conjunction with sales team and Technical Director

Carry out other duties as requested by the Technical Director
